

Owl's Earth and Sun Discovery

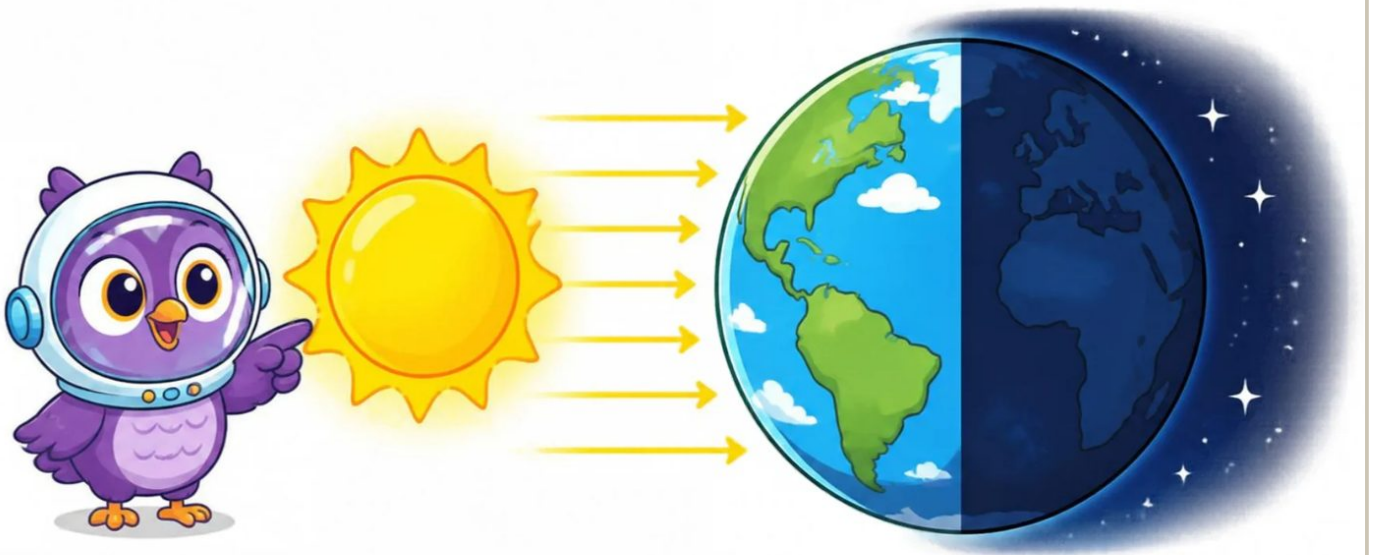

Circle the side of Earth that has DAY!

Name _____

_____ Date

Owl's Earth and Sun Discovery

Circle the side of Earth that has DAY!

A. LEFT SIDE OF EARTH

B. RIGHT SIDE OF EARTH

My Earth observation

Draw your house — is it day or night there?

For grown-ups

The LEFT side has day — the sunbeams land there. The dark right side is having night, and Earth's slow spin swaps them round.
